---

According to Vibram Five Fingers reports, the British chip designer ARM Xinhua reported Tuesday that second-quarter profit and sales have seen substantial growth this year will maintain strong growth.

ARM's second quarter revenue 150.3 million U.S. dollars, higher than last year's 105.5 million U.S. dollars, higher than Wall Street analysts average estimate of 141.4 million U.S. dollars. The earnings per share of 2.34 pence, well above last year's 0.95 pence 1.83 pence higher than the average Wall Street analyst expectations.

ARM's chip architecture(Five Fingers Shoes) is widely used in mobile devices such as iPhone and iPad, the company is expected in the second half of the target market share will continue to increase.

ARM CEO Warren East said, ARM to the strong performance very satisfactory. He said: "Our strategy will continue as planned in the mobile and non mobile and new areas of growth in outsourcing. Major semiconductor manufacturers and consumer electronics companies have already committed to long-term use in future ARM technology products."
